U.S. National Park Service

NOTE for all U.S. National Park Service citations: After the Second World War, National Park Service guides to park units became essentially just guides to services and activities, foregoing the pre-war style of including essays and other culturally informative texts in addition to visitors' information and rules and regulations. The pre-war publications are cited here in Part 2 (GENERAL PUBLICATIONS) of this bibliography—see also under U.S. Department of the Interior. However, pre-war guides specifically for hiking, driving and similar activities are listed in Part 9 of this bibliography. Beginning in 1977 park-specific productions include the standardized "Unigrid" publications, which feature a black-background banner on the front of each, with at least the Park Service unit noted as text within the banner (see examples in the Notes to Part 9). Special accessibility guides for physically impaired users are also listed in Part 5 of this bibliography. See also Part 6/Section 1 for Park Service items that were produced for younger readers and users. See also Part 31 (NEWSPAPERS) of the bibliography for citations of pertinent park-unit newspapers, which served similar functions to the activities guides (for example, *Grand Canyon National Park Guide* and related titles, ITEM NO. 31.36).

(The modern translation from Ramussio by Flint and Flint, 2005, ITEM NO. 2.29150, p. 254, renders the map as a "painting" more particular to portraying the "rugged mountains and rivers" [see their *endnote 25* on p. 653]; perhaps thus it was a pictorial map, like those of Miera de Pacheco [noted particularly in the *Cartobibliography* (THE GRAND CANON Volume 2; in the present volume refer to Part 25). Nonetheless, Wheat listed this putative map as the first item in his "Bibliocartography", "for, though still undiscovered, it may one day come to light, and it well merits the number one position accorded it in the accompanying bibliocartography." (p. 18). Although of peripheral interest to the present bibliography, the map would not have included any information about the separate expedition that reached the Grand Canyon, as that did not take place until September 1540.] [In Italian.]

2014 2.28516 Kaksi koleankaunista yötä. Suomen syksy on jo hyvää vauhtia taipumassa talven kainaloon, kun kone suuntaa Yhdysvaltoihin. Mukana on rinkka ja paljon tarvikkeita, koska säät eivät välttämättä ole juuri lämpimämpiä siellä, minne menen. Kyse on kahdesta länsirannikon vaikuttavasta kansallispuistosta. *Suomi-USA* (Suomi-Amerikka-Yhdistysten liitto, Helsinki), (April): 10-11. [See “Syyskuu 30. (“The Laughing Mathematician offered these reflections on the VanceBBS (http://publ.ezboard.com/bjackvance) in a recent conversation there about LURULU”. [*Lurulu* is the science fiction title by Jack Vance.]) [See p. 21, a comment on “language [being] the subject of fluctuations”, to which is appended a footnote (unclear as to whether it is by Vyverman or by Rhoads, who was traveling the western U.S. while reading *Lurulu*), which because of the obscurity of *Extant* is repeated here: “A good example hereof is the following: at the drinks-and-munchies booth on the edge of the Grand Canyon [which must be the one at Bright Angel Lodge], the Asian-looking fellow in front of me points to a list of available wares, and declares in a high-pitched voice: ‘Hoooooooooo Shukelei’. The lady in the booth blinks and goes ‘Whaa?’. The fellow points agitatedly at the list, and keeps repeating ‘Hoooooooooo Shukulei’, interrupted by an occasional ‘Whaa? Whatcha waaaan?’. The fellow now begins hopping from one leg onto the other, and the lady finally leans out and cranes her neck to see what he’s pointing at: ‘Awww... U waaan hawt chucklit!!!’”] [Hot chocolate.]

To give some idea of its height: as you stand at the bottom at noon in a clear day and look towards the heavens it seems as tho' the summit of the canon touched the skies, 7,500 feet up, and you see stars as distinctly as tho' 'twere midnight; one is struck with awe and admiration at the mighty works of nature. [Includes: "Blaine Walker, of Fox, made the first pictures from the air of the Grand Canyon in Arizona. [¶]The pilot he took with him from San Francisco was a good pilot—at sea level. But he found it almost impossible to handle a plane at the high altitude of the Canyon. So Walker was obliged to dismiss him. Meanwhile an army pilot had arrived, unannounced, on the Canyon rim. Walker tried to secure his services to make the picture but he was unable to get a permit from army officials to ride with him. [¶]Finally, however, he did manage to get himself and his camera into the plane with the mechanic at the controls. It was a windy day and flying conditions were bad—but Walker got the first pictures ever made from the air—below the rim of the Canyon, between precipitous and in many places, very narrow walls of the gorge. [¶]That was an outstanding scoop for Fox." (ENTIRE ITEM) (Grand Canyon scenes not illustrated in this item.)]

While not the preferred route for reaching the Grand Canyon of the Colorado, one may, with some loss of time, reach this greatest of chasms by leaving the Southern Pacific at Maricopa and traveling northward. [¶] The direct route from the East to the Grand Canyon is by way of the Atchison, Topeka and Santa Fe. At least two days should be allowed for a stop-over at the Canyon. [. . .] The southern routes are, of course, warmer and the mountain scenery is less impressive than by the central and northern routes, yet the Grand Canyon of the Colorado is one of the most wonderful places in all of our western Wonderland.” (ENTIRE NOTE)]

Willy, John

1919	2.129	A journey to North Rim of Grand Canyon. The editor rides for a thousand miles in George Relf's car thru desert, oases and forest and sees many strange sights. Travel adventures away from railroad, telegraph and modern conveniences. A wayfaring that brings few disappointments and many delightful surprises. Opening a book of new pictures to delight those who travel with the glad eye. Pioneering the coming scenic resort of the world—a combination of mountain, valley, desert, forest and canyon; of the cultivated and the wild; of the new and the old—the climax capped with a penetration of the greatest and most beautiful of natural forests, and the greatest and most wonderful of chasms. *The Hotel Monthly* (Chicago), 27(319) (October): 45-64. [Author credit given only as "the Editor".]
1920	2.17564	The Gun Book. *The Hotel Monthly* (Chicago), 28 (January): 44. ["The editor has just finished reading 'The Gun Book' written by Thomas Heron McKee, who last summer managed the Wylie Camp on the north rim of Grand Canyon, Arizona. Mr. McKee is a son-in-law of Wm. 2015 2.29701 I sing you for an apple. *New England Review*, 36(2): 54-67. ("In memoriam Steinbjørn Berghamar Jacobsen, September 30, 1937-April 12, 2012".) [Regarding the author's fill-in service as an escort interpreter for Jacobsen, the Faroese-speaking poet and writer during a U.S. tour. (Wilson did not speak Faroese himself but made do with some knowledge of old Icelandic and Swedish, "with Danish words thrown in", since Jacobsen's Danish was actually "something of his own invention". Eventually incorporating more Faroese words, their "two versions of 'Danish' more or less merged"; all this was compounded by Jacobsen's free use of alcohol). Concludes (pp. 64-66) with recollections of Jacobsen's spur-of-the-moment decision to hike into Grand Canyon alone, without shirt or shoes(!), and his late arrival back on the rim in poor condition after apparently having gone to the bottom. Jacobsen recounted that he had, in very broken English, begged food and water from hikers: "I sing you for an apple". He said that he would write a memoir about his American trip. "He would not entitle it in the Faeroese '*Eg sang fryi eitt súrepli!*' It would be just what he had told the other hikers, in English: '*I Sing You for an Apple!*'"] [For this bibliography I have found Jacobsen's memoir, in Faroese, which does include Grand Canyon, but it is entitled *Brá úr USA* (Jacobsen, 1982, ITEM NO. 2.29694).]

[Report of meeting Clarence Frank Birdseye, II, aboard a train “coming down from Michigan”. In quotation format, principally of Birdseye’s recounting activities studying wolves for the U.S. Department of Agriculture. Includes the note: “I have been over a good deal of the West, over the desert, down into southern Utah, across the Grand Canyon, in Arizona and New Mexico. I have lived among the Moquis and among the Navajos and other Indians and explored hidden and abandoned cities of cliff dwellers. Once I found a new species of rat in an old cliff dweller house. I reckon he was a descendant of one of the rats that troubled the old people who lived there 10,000 years ago, maybe.” Clarence Birdseye, later the frozen-foods entrepreneur, was a distant cousin of Claude H. Birdseye, who surveyed the Colorado River through Grand Canyon (see references to Claude H. Birdseye in this bibliography).]

SUPPLEMENT TO PART 2

Potentially Offensive Material Cited Separately

Part 2 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in this Supplement. It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter. (Off-color language is not considered reason for segregation.)

IN PART 2, ITEM NUMBERS IN *ITALICS* INDICATE PUBLICATIONS THAT PERTAIN ONLY TO THE LOWER COLORADO RIVER REGION OR TO ADJACENT UPPER GULF OF CALIFORNIA

PART 3. *THE NEW YORK TIMES*

GRAND CANYON AND LOWER COLORADO RIVER ARTICLES

OVERVIEW. *The New York Times* has long been widely available on microfilm, and now in digital format.* The first issue of what originally was named *New-York Daily Times* appeared September 18, 1851 (changed to *The New York Times* in 1857). Its comprehensive and authoritative editorial view of national affairs, as well as its traditionally well-respected writing, makes it a useful resource on national perspectives of events and issues in the Southwest. The longevity of this newspaper allows it to serve the Grand Canyon-Colorado River bibliography back to the time of the first American expeditions through what would be Arizona, by Lorenzo Sitgreaves (1851) and Joseph C. Ives (1857-1858) as well as on the Colorado by John Wesley Powell (1869, 1871, 1872).

**New York Times* archive search website: http://nytimes.com/search/ (portions of this website may require registration for a fee).

The proliferation of newspapers now accessible online rather reduces the original, enthusiastic purpose of this part of THE GRAND CANON, which originally was Part 9 of the 1981 print version, *Bibliography of the Grand Canyon and the Lower Colorado River, 1540-1980*. At that time, access was only through archived hard copies or on microfilm. The revised 2nd Edition (1990) introduced a guide to regional newspapers (Part 10 of that edition), again with the thought that it would assist users in search of repositories that might hold them or microfilmed copies. (See the Appendix to Part 1 herein for a rundown of the contents of the predecessors to THE GRAND CANON, and Part 31 herein for the current newspaper guide.) Today, many of these titles are accessible online, including the fully searchable *New York Times*, though some remain stubbornly secluded in the world of paper. It must be additionally noted that the online presentation of the *Times* has evolved, and it is more difficult now to obtain proper citations from those issues. The *Times* archive may permit examination of PDF copies of whole issues as well as individual articles. But more recent years are no longer available as images from the printed paper, nor are original paginations always indicated. Indeed, sometimes it is difficlult to distinguish between articles that were in inkprint and those that were only available online; a serious consideration when one expects to have access to dispersed, identical copies particularly in a "doomsday" scenario of the cessation of the web.

NOTE REGARDING CITED PAGINATION AND TITLES

THE pagination for items listed in this part was originally gathered from the published *New York Times Index*. After examining some copies posted to the *New York Times* Archive online, years later, some modifications were made in the citations here. For example, a Times Index pagination of "E6" seems to have pertained to the "Editorial" section of the paper, which on examination showed page 6 of "Section 2". Similarly, various paginations from the Times Index displaying prefixes such as "X" or "XX" in conjunction with page numbers apparently refer to printers' collation marks in the page banners of the published papers. Some sections may be identified in the Times' indexing style as "BU" for Business section, "TR" for Travel section, and so forth. Further, some items seen in earlier online postings seem to have displayed paginations that enumerated pages consecutively throughout a day's issue, through all parts. However, a low-number pagination by itself will indicate it appears in Section 1 of the newspaper. Variations may also reflect different editions of the day's paper (for example, the City Edition or the Late Edition).

Pagination taken from examples seen in the New York Times Archive online usually pertain to the City Edition. The citations as displayed in this part of the bibliography thus may not perfectly represent a particular copy of the paper examined by a researcher. One problem stems from the contrivances of those who created the indexing for online copies without understanding the researcher's need for precision in citations. Another problem is the reordering of articles on different pages between the day's editions; the result of the daily work of the editors of *The Times*.

Some citations do not include page numbers; these were seen in *New York Times* online postings that omitted pagination but which do credit date of paper publication.

Titles are as printed in the newspaper. However, in the 2010s and later, with the more robust development of online offerings by *The Times* (among which only those that appeared in the print editions are cited herein), the online versions often have different titles, and sometimes varying content and illustrations. Citations continue to follow the print editions, for the various reasons, stated elsewhere herein, regarding the omission of web-only offerings.

GO TO BIBLIOGRAPHY TABLE OF CONTENTS

NOTE REGARDING CITED PAGINATION AND TITLES

THE pagination for items listed in this part was originally gathered from the published *New York Times Index*. After examining some copies posted to the *New York Times* Archive online, years later, some modifications were made in the citations here. For example, a Times Index pagination of "E6" seems to have pertained to the "Editorial" section of the paper, which on examination showed page 6 of "Section 2". Similarly, various paginations from the Times Index displaying prefixes such as "X" or "XX" in conjunction with page numbers apparently refer to printers' collation marks in the page banners of the published papers. Some sections may be identified in the Times' indexing style as "BU" for Business section, "TR" for Travel section, and so forth. Further, some items seen in earlier online postings seem to have displayed paginations that enumerated pages consecutively throughout a day's issue, through all parts. However, a low-number pagination by itself will indicate it appears in Section 1 of the newspaper. Variations may also reflect different editions of the day's paper (for example, the City Edition or the Late Edition).

Pagination taken from examples seen in the New York Times Archive online usually pertain to the City Edition. The citations as displayed in this part of the bibliography thus may not perfectly represent a particular copy of the paper examined by a researcher. One problem stems from the contrivances of those who created the indexing for online copies without understanding the researcher's need for precision in citations. Another problem is the reordering of articles on different pages between the day's editions; the result of the daily work of the editors of *The Times*.

Some citations do not include page numbers; these were seen in *New York Times* online postings that omitted pagination but which do credit date of paper publication.

Titles are as printed in the newspaper. However, in the 2010s and later, with the more robust development of online offerings by *The Times* (among which only those that appeared in the print editions are cited herein), the online versions often have different titles, and sometimes varying content and illustrations. Citations continue to follow the print editions, for the various reasons, stated elsewhere herein, regarding the omission of web-only offerings.

PART 4. MEMORIALS

OVERVIEW. This part lists necrologies, obituary notices and some commemorative or retrospective memorials. Such sketches are cited here only if the citationist refers to the Grand Canyon or the Colorado River; others commemorate individuals who were prominent in the history of these regions. Various notices of persons who died while at Grand Canyon are included here. A few beloved animals are also memorialized.

Editors' note (p. 27): "This appreciation of the Grand Cañon was written by Henry Wickham Steed, editor of the great London 'Times,' and appeared as a special article in that paper. Many of our readers doubtless would recognize, without being told, that the High Priest mentioned by Mr. Steed was the late Charles A. Brant, manager of El Tovar. We had this article in type prior to Mr. Brant's demise, intending to run it as a tribute to the living—instead it now appears as a requiem over the departed."] [The article first appeared as "Among the Silent Gods: The Grand Canyon", *The Times*, September 12, 1921, p. 9.]

It had been the dream of Mr.

Oppmann to build an electric railway into the heart of the grand canon of the Colorado. The plan was to tunnel from the head of the gorge down under one side and into the river bed thousands of feet below. Repeatedly Mr. Oppmann went before congress with the proposition. At the last session it was considered by the house committee on public lands, but never came before congress.” (ENTIRE NOTE)]

[“Grand Canyon—’Supai Mary’ Wescogame, oldest member and uncrowned queen of the small Havasupai Indian tribe that resides in the bottom of the Grand Canyon, is dead. She was buried at Drift Fence, Supai graveyard located at the top of beautiful Havasu Canyon in late April. Records in the Indians Affairs [*sic*] office show that she was born in 1866, but her children insist she was 97 ‘summers’ old at her death. She was the daughter of Captain Burro, old-time chief of the tribe under whose direction the Havasupais withstood attacks of the warring Apache tribes.—*Coconino Sun*." (ENTIRE ITEM)]

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

PART 5

PUBLICATIONS FOR PEOPLE WITH DISABILILTIES

Publications for and which relate to the interests and needs of people with various impairments

SECTION 1	Publications produced especially for the blind and vision-impaired
SECTION 2	Conventional publications that relate to the experiences of or information of interest to the blind and vision-impaired
SECTION 3	Publications that relate to people with hearing impairments
SECTION 4	Publications that relate to people with mobility or activity impairments, and publications pertaining to special-needs resources

PART 5. PUBLICATIONS FOR PEOPLE WITH DISABILITIES
(GRAND CANYON AND LOWER COLORADO RIVER REGIONS)

OVERVIEW

Section 1: **Publications produced especially for the blind and vision-impaired.** This section contains citations mostly for items that are in large-print or Braille formats and audio materials made expressly by agencies who produce materials for the blind and vision-impaired. Other, unusual formats are included, too; for example, tactile material in Moon Type. Many citations have been derived from Library of Congress catalogue records, and of course this part of the bibliography should not be construed to be comprehensive because there are likely to be many products for this audience that are not in accessible catalogs.

Section 2: **Conventional publications that relate to the experiences of or information of interest to the blind and vision-impaired.** Unlike the publications cited in Section 1, these works are not in special formats for the blind or visually impaired, but are conventionally printed books and serials. Topically, they concern the experiences of blind and visually impaired people, and information of interest to them. Various citations may be repeated here from other parts of this bibliography.

Section 3: **Publications that relate to people with hearing impairments.** The publications cited here concern the experiences of the deaf and hearing impaired within the region covered by this bibliography. They are relegated to their own section also to bring attention to readers the perspectivess and needs of these people, who might otherwise be overlooked among other people with impairments. The citations are repeated here from other parts of this bibliography.

(continued)

Section 4: **Publications that relate to people with mobility or activity limitations, and special-needs resources.** Citations in this section identify those publications that relate the Grand Canyon or Colorado River experiences of people with mobility or activity limitations, and publications that pertain to area travel information specifically for these people, and for people with special needs. By considering mobility or activity limitations as either physical or cognitive in nature as the result of congenital condition, chronic or accute disease, accident, or age-related condition, the definition embraces a wide spectrum of people. The citations are repeated here from other parts of this bibliography.

Not included here are publications that pertain to people who may experience socially related difficulties; for example, at-risk youth or people with mental health concerns or social distresses like physical or sexual abuse and personal emotional troubles. Publications pertaining to any of these issues as they may be addressed within the region covered by this bibliography will be found in Part 14, which includes the subject area of sociology, and Part 15, which addresses various aspects of physical and mental health. However, publications pertaining to certain programs that can address either or both physical and emotional concerns—such as the Wounded Warrior programs that conduct therapeutic trips on the Colorado River for military veterans who are physically wounded or suffer from post-traumatic stress disorder (PTSD) or other emotional conflicts—are consolidated in this appendix, repeated from scattered citations in other parts of this bibliography.

Sections 2–4 repeat citations that are included in other parts of the bibliography. Each citation is renumbered here with the PART 5. prefix.

NOTES FOR PART 5, SECTION 1

Refer to PART 27 (AUDIO WORKS) for conventional mass-market audio recordings.

While it might be desirable to include publications that are available in digital formats (for example, BRF, an electronicic Braille format for users with appropriate hardware or with speech output from digital files), most such products are directly and only available online. For more information see the Library of Congress webpage for BARD—the Braille and Audio and Reading Download from the National Library Service for the Blind and Print Disabled (NLS) at https://www.loc.gov/nls/about/services/braille-audio-reading-download-bard/
The "National Library Service (NLS) is a free braille and talking book library service for people with temporary or permanent low vision, blindness, or a physical, perceptual, or reading disability that prevents them from using regular print materials. Through a national network of cooperating libraries, NLS circulates books and magazines in braille or audio formats, that are instantly downloadable to a personal device or delivered by mail free of charge." (from the NLS website).

As with "ebooks" and similar products such as those that would be cited elsewhere in this bibliography, the fact that they may not be available in the future precludes listing them herein; they are not physically acquirable at this time. Readers interested in these resources should consult their library for the blind or websites that may offer these products.

Many of these publications are transcribed or voice-recorded from previously published conventional publications, which are cited in other parts of this bibliography. Titles prepared for use by readers with dyslexia may be found in Section 4 of this part of the bibliography.

(continued)

The general page layout for Section 1 is modeled after display pages on an earlier presentation of the website of the Library of Congress's National Library Service for the Blind and Physically Handicapped (now the National Library Service for the Blind and Print Disabled), https://www.loc.gov/nls/. (Current presentations are different, probably to reflect improvements in the ways users interact with the website.)

NOTE TO PART 5, SECTION 2

Unlike the publications cited in Section 1, these works are not in special formats for the blind or visually impaired, but are conventionally printed books and serials. Topically, they concern the experiences of blind and visually impaired people, and information of interest to them. Various citations may be repeated here from other parts of this bibliography.

To assist users with vision limitations the general page layout for Section 2 is modeled after display pages on website of the Library of Congress's National Library Service for the Blind and Print Disabled, https://www.loc.gov/nls/.

PART 5

PUBLICATIONS FOR PEOPLE WITH DISABILITIES

SECTION 4

PUBLICATIONS THAT RELATE TO PEOPLE WITH MOBILITY OR ACTIVITY LIMITATIONS, AND PUBLICATIONS PERTAINING TO SPECIAL-NEEDS RESOURCES

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

NOTE FOR PART 5, SECTION 4

THE citations in this appendix identify those publications that relate the Grand Canyon or Colorado River experiences of people with mobility or activity limitations, and publications that pertain to area travel information specifically for these people, and for people with special needs. By considering mobility or activity limitations as either physical or cognitive in nature as the result of congenital or develomental condition, chronic or accute disease, accident, or age-related condition, the definition embraces a wide spectrum of people. The citations are repeated here from other parts of this bibliography.

Publications pertaining to certain programs that can address either or both physical and emotional concerns — such as the Wounded Warrior programs that conduct therapeutic trips on the Colorado River for military veterans who are physically wounded or suffer from post-traumatic stress disorder (PTSD) or other emotional conflicts — are consolidated in this appendix, repeated from scattered citations in other parts of this bibliography.

While some people may consider that publications by or about amputees, for example, who perform activities as well as fully-limbed people, should not be itemized in this Section, they often relate stories or information about special functions or devices—and personal perseverence—that allow affected individuals to be successful in these activities. Accordingly, the publications are added here for the sake of readers who may be encouraged by them.

Not included here are publications that pertain to people who may experience *socially* related difficulties; for example, at-risk youth or people with mental health concerns or social distresses like physical or sexual abuse and personal emotional distresses. Publications pertaining to any of these issues as they may be addressed within the region covered by this bibliography will be found in Part 14, which includes the subject area of sociology, and in Part 15, which addresses various aspects of physical and mental health.

Specifically (p. 68): "The original case study was to observe the differences between the various residual limb length categories of transtibial amputees. This case study subject was abandoned due to some last minute cancelations with the group's amputee participants. The decision to monitor the volume fluctuations within the amputee members' residual limbs was made. The amputee and non-amputee members within the group were also tracked for their falls throughout the trip. In addition to the fall count and residual limb measurements, the number of times an amputee had to stop and remove their prosthesis was counted."]

PART 6. PUBLICATIONS FOR AND BY YOUTH AND YOUNG ADULTS (GRAND CANYON AND LOWER COLORADO RIVER REGIONS)

OVERVIEW. This part includes all those works traditionally referred to as "juvenile"; it lists works that also are appropriate for "young adult" audiences or otherwise published in young- or adolescent-reader venues. This includes school students through the high-school years. Included here are so-called graphic novels (or comic books) designed for younger audiences. Also included here are works created by young and adolescent authors.

The "Fiction" section lists novels and other purely fictional works, including works written as "historical fiction" and matter that follows a fictional narrator or human character even though the content of the work is factual.

RELATED MATERIAL

PART 26. AUDIO–VISUAL WORKS for films and recordings that may be suitable for younger audiences

---

NOTE FOR PART 6

"GRAPHIC NOVELS", once better known just as "comic books", were chiefly for young-reader audiences. In more recent time the genre has evolved to include graphic novels produced for adult audiences. These distinctly newer productions, with themes for more mature readers, are relegated in this bibliography to PART 7. FICTION. Even the "comic book" market of productions originally for younger readers has also evolved to embrace readers of post-adolescent ages, as the attendance at "comic book" conventions and similar events testifies, even though this is driven partly by the collectibles market. Nonetheless, following convention implicit young-reader titles (for example, *Superman* or *Justice League of America*) remain listed in Part 6, Section 2 of this bibliography.

Items that relate to the *activities* of younger people, not written by a younger writer, are relegated to the pertinent part of the bibliography to which its subject pertains.

C., Robert C.

1886 6.1613 [Letter.] *In:* Our Post-Office Box [SECTION]. *Harper's Young People*, 8(368) (November 16): 47. ["Fort Mojave, Arizona Territory. [¶] Dear Postmistress,—I am the son of an army officer, and am seven and one-half years old. I have a sister five and one-half years old. She and I have great fun playing together. It is very hot here in the summer, but now it is quite cool and pleasant. The Mojave Indians live near the post. They are quite peaceable, and never go on the war-path like the Apaches. The climate being so warm, these Indians wear very little clothing, and go about almost naked. The post is built on the Colorado River, about twenty-two miles from Needles, California. The Grand Cañon of the Colorado is about one hundred miles distant. I think I will visit it with my papa next year. I hope you will print this letter, although it is my first to you. Robert C. C."
